

Alternative Water Solutions

VectaPureUF360

- Reduces viruses up to 99.9999%
- Reduces bacteria up to 99.99%
- Reduces chlorine, taste, odor and chloramines
- Reduces parasitic protozoan cysts (Giardia, Entamoeba, Cryptosporidium)
- Effectively reduces volatile organic chemicals (VOC), including trihalomethanes (THM)
- Reduces lead to below the Federal Action Level of 15 ppb

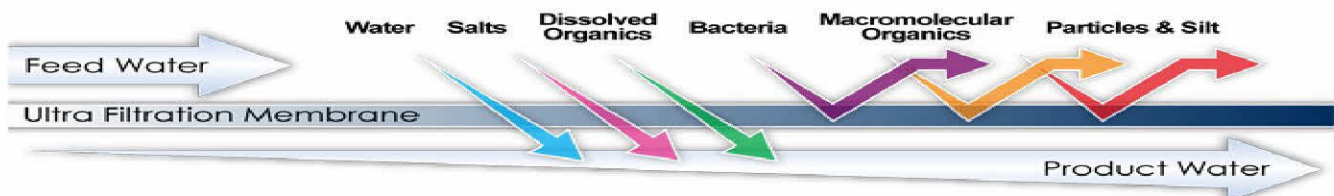

Water Purification Technologies – Ultrafiltration

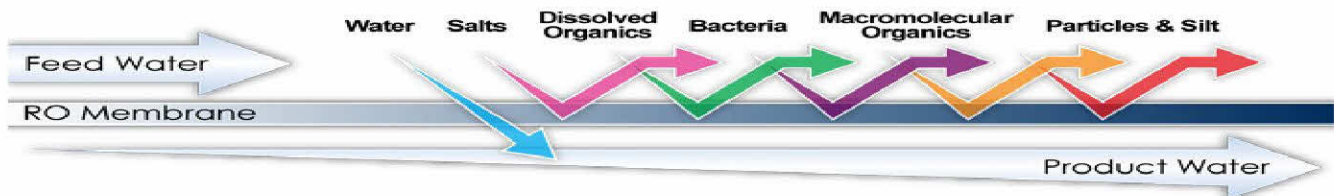

Water Ultrafiltration is a membrane filtration process which uses standard home water pressure to push water through its semi-permeable membrane. Suspended particles and materials of high molecular weight are unable to pass through the 0.02 micron UF Ultrafiltration membrane, allowing only fresh clean water and dissolved minerals to pass through.

UltraFiltration

Reverse Osmosis
